## **MaverickLabel.Com Announces New, Lower Minimum Quantity on Integrated Shipping Label Sheets**

### **FOR IMMEDIATE RELEASE**

October 1, 2007 – Edmonds, Washington - MaverickLabel.Com, leading pioneer of label product sales via the Internet, today announced a new 250 minimum quantity on its integrated shipping labels product line.

“The new 250 minimum allows small businesses to take advantage of the benefits of this time-saving product,” said Mark Trumper, MaverickLabel.Com CEO. “We realized that many businesses might not send out a large amount of invoices throughout the course of a typical month or quarter. So, we have revamped our integrated shipping label sheets offering to make it more economically feasible for our customers to use this unique product,” Trumper went on to say.

Integrated shipping labels sheets from MaverickLabel.Com streamline shipping and invoice mailing by combining invoices/packing lists with shipping labels. Maverick’s shipping label sheets are label form combinations that allow consumers to print shipping labels and invoices on the same sheet - in one pass through most laser and/or ink jet printers. This integrated label system saves time and money. Just print and peel off the labels.

Shipping label sheets are blank with labels pre-applied in differing areas, compatible with popular invoice shipping label software applications including USPS Click-n-Ship®, FOURZ and Mail Order Manager.

Integrated shipping label sheets come with the following features:

- **24 Hour Turnaround**
- **Low 250 Minimum Order Quantity**
- **Compatible With Popular Shipping Label Software**

The product works with most desktop laser and/or inkjet printers. And, MaverickLabel.Com offers free samples to make sure these laser shipping forms work with your printer and your invoice shipping label software.
